SEEAT Supporting Pupils with Medical Conditions Policy 2026

Title	Supporting Pupils with Medical Conditions
Author	Caroline Thornton
Owner	SEEAT
Status	Review 4
Ratified Date	24 th September 2026
Ratified by	Approved by the Education Committee adopted by the Local Governing Body (LGB)
Review Cycle	Bi-Annual
Review Date	September 2028 (or before if required)

Rochford Primary and Nursery School

School Information and Key Contacts

School Context

We are a 1 form entry Primary school with a strong community. A number of our pupils have complex medical needs and our staff are fully trained and equipped to support each individual need.

Names of First Aiders:

First Aid: Andrea Reynolds

Emergency First Aid at Work: Lesley Ware, Lily Robertson, Natalie Bull, Ryan Swindell, Sam White, Lisa Adams, Louise Reely, Jenny Robinson

Pediatric First Aid: Louisa Chittenden, Natalie Bell, Jenny James, Sue Arrowsmith, Cara Heath, Ryan Swindell, Lily Robertson, Gracie Johnson.

Name of staff member with delegated responsibility for Individual Healthcare Plans:

Hannah Reddihough

School Nurse Contact Details:

Adena Sayer Adena.Sayer@hcrhcaregroup.com

Charlotte Edwards Asthma & Allergy Nurse charlotte.edwards2@nhs.net

Headteacher:

Shane Owen

2. Introduction

South East Essex Academy Trust (SEEAT) is committed to ensuring that all pupils, including those with medical conditions, have full access to education and can participate in all aspects of school life safely and successfully. The Trust recognises its duty to make appropriate arrangements to support pupils with medical conditions and, where necessary, make reasonable adjustments to enable them to access the curriculum, educational visits, extracurricular activities and wider opportunities on the same basis as their peers.

SEEAT is committed to working in partnership with pupils, parents, carers and healthcare professionals to ensure that medical needs are properly understood and supported. Every effort will be made to ensure that pupils with medical conditions receive appropriate care and support whilst attending school and that arrangements are implemented in a timely, consistent and effective manner.

All medical information provided to schools within the Trust will be treated as confidential and handled in accordance with data protection legislation. Information will only be shared with staff and other relevant individuals on a need-to-know basis to support the health, safety and wellbeing of the pupil. Wherever practicable, decisions regarding the sharing of information will be discussed with the pupil and their parents/carers. For the purposes of this policy, the term 'parents' includes all those with parental responsibility for a child.

Each Trust school will maintain and implement procedures appropriate to its setting to support the effective application of this policy. Medical conditions relating to allergies will be managed in accordance with the Trust's Allergy Safety Policy, which should be read alongside this policy.

Any concerns or complaints regarding the support provided to a pupil with a medical condition will be addressed in accordance with the Trust's Complaints Policy. Information regarding the school's insurance arrangements is available on request.

Allergies are recognised as a medical condition and will be supported in accordance with this policy and the SEEAT Allergy Safety Policy, which provides specific guidance on allergy management, risk reduction and emergency response.

3. Aims

This policy aims to ensure that:

- Pupils, staff, and parents understand how each Academy will support pupils with medical conditions
- Pupils with medical conditions are properly supported to allow them to access the same education as other pupils, including school trips and sporting activities

The local governing body for each Academy will implement this policy by:

- Making sure sufficient staff are suitably trained
- Making staff aware of pupil's condition, where appropriate
- Making sure there are cover arrangements to ensure someone is always available to support pupils with medical conditions
- Providing supply teachers with appropriate information about the policy and relevant pupils
- Developing and monitoring individual healthcare plans (IHPs)

4. Legislation and Statutory Responsibilities

This policy meets the requirements of [Section 100 of the Children and Families Act 2014](#), which places a duty on governing bodies to decide for supporting pupils at their school with medical conditions. This policy is based on the Department for Education's statutory guidance, Supporting Pupils at School with Medical Conditions.

This policy also complies with SEEAT's funding agreement and articles of association.⁵

Roles and Responsibilities

5.1 Local Governing Body

The local governing body for each school has ultimate responsibility to make sure there are adequate arrangements to support pupils with medical conditions. Each local governing body will ensure that sufficient staff have received suitable training and are competent before they are responsible for supporting children with medical conditions.

5.2 Headteacher (*or a named person delegated by the head teacher*)

The headteacher will:

- Make sure all staff are aware of this policy and understand their role in its implementation
- Ensure that there is enough trained staff available to implement this policy and deliver against all individual healthcare plans (IHPs), including in contingency and emergency situations
- Take overall responsibility for the development of IHPs
- Make sure that school staff are appropriately insured and aware that they are insured to support pupils in this way

- Contact the appropriate school nursing service in the case of any pupil who has a medical condition that may require support at their Academy, but who has not yet been brought to the attention of the school nurse
- Ensure that systems are in place for obtaining information about a child's medical needs and that this information is kept up to date

5.3 Staff

Supporting pupils with medical conditions during school hours is not the sole responsibility of one person. Any member of staff may be asked to provide support to pupils with medical conditions, although they will not be required to do so. This includes the administration of medicines.

Those staff who take on the responsibility to support pupils with medical conditions will receive sufficient and suitable training and will achieve the necessary level of competency before doing so.

Teachers will consider the needs of pupils with medical conditions that they teach. All staff will know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

5.4 Parents

Parents will:

- Provide the school with sufficient and up-to-date information about their child's medical needs
- Be involved in the development and review of their child's IHP (where one is required) and may be involved in its drafting
- Carry out any action they have agreed to as part of the implementation of the IHP e.g., provide medicines and equipment, and ensure they or another nominated adult are always contactable.

5.5 Pupils

Children and young people with medical conditions will often be best placed to provide information about how their condition affects them. Pupils should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of their IHPs. They are also expected to comply with their IHPs.

5.6 School Nurses and other Healthcare Professionals

The school nursing service will notify the school when a pupil has been identified as having a medical condition that will require support in school. This will be before the pupil starts at the school, wherever possible. They may also support staff to implement a child's IHP.

Healthcare professionals, such as specialist nurses GPs and paediatricians, will liaise with the school nursing service and notify them of any pupils identified as having a medical condition. They may also provide help on developing IHP's.

6. Equal opportunities

The Trust is clear about the need to actively support pupils with medical conditions to participate in school trips and visits, or in sporting activities, and not prevent them from doing so.

The school will consider what reasonable adjustments need to be made to enable these pupils to participate fully and safely on school trips, visits, and sporting activities.

Risk assessments will be carried out so that planning arrangements take account of any steps needed to ensure that pupils with medical conditions are included. In doing so, pupils, their parents and any relevant healthcare professionals will be consulted.

7. Being notified that a child has a medical condition

When the school is notified that a pupil has a medical condition, the process outlined below will be followed to determine whether an Individual Healthcare Plan (IHP) is required and to identify any reasonable adjustments or support arrangements needed. The school will ensure that appropriate support is implemented as soon as reasonably practicable. Where an IHP is required, every effort will be made to put arrangements in place within 2 weeks of notification, or by the beginning of the relevant term for pupils who are new to the school. In cases where a pupil's medical condition presents an immediate risk to their health, safety or access to education, interim support arrangements will be implemented without delay while the IHP is being developed. See Appendix 1.

8. Individual Healthcare Plans

The headteacher has overall responsibility for the development of IHPs for pupils with medical conditions. If the role has been delegated, please see the opening page.

Plans will be reviewed at least annually, or earlier if there is evidence that the pupil's needs have changed. Plans will be developed with the pupil's best interests in mind and will set out:

- What needs to be done
- When
- By whom

Not all pupils with a medical condition will require an IHP. It will be agreed with a healthcare professional and the parents when an IHP would be inappropriate or disproportionate. This will be based on evidence. If there is not a consensus, the school headteacher will make the final decision.

Schools will work proactively with pupils, families, health professionals and any relevant agencies to minimise the impact of medical conditions on attendance and educational engagement. Where a pupil's attendance is affected by a medical condition, arrangements will be considered to support continued access to education and reintegration following periods of absence.

Plans will be agreed in partnership with the school, parents, and a relevant healthcare professional, such as the school nurse, specialist, paediatrician, who can best advise on the pupil's specific needs. The pupil will be involved wherever appropriate.

IHPs will be linked to, or become part of, any education health, and care plan (EHC). If a pupil has SEND but does not have an EHC plan, the pupil's SEND needs will be mentioned in the IHP.

The level of detail in the plan will depend on the complexity of the child's condition and how much support is needed. The headteacher, or the person delegated by the head teacher and SENDCo (Special Educational Needs Coordinator) where a student is identified as SEN or has an EHCP (Education Health and Care Plan) will consider the following when deciding what information to record on IHPs:

- The medical condition, its triggers, signs, symptoms, and treatments
 - The pupil's resulting needs, including medication (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues, e.g. crowded corridors, travel time between lessons
 - Specific support for the pupil's educational, social, and emotional needs. For example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions
 - The level of support needed, including in emergencies. If a pupil is self-managing their medication, this will be clearly stated with appropriate arrangements for monitoring
 - Who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the pupil's medical condition from a healthcare professional, and cover arrangements for when they are unavailable
 - Who in the school needs to be aware of the pupil's condition and the support required
 - Arrangements for written permission from parents and the headteacher for medication to be administered by a member of staff, or self-administered by the pupil during school hours
-
- Separate arrangements or procedures required for school trips or other activities outside of the normal school timetable that will ensure the pupil can participate, e.g. risk assessments
 - Where confidentiality issues are raised by the parent/pupil, the designated individuals to be entrusted with information about the pupil's condition
 - What to do in an emergency, including who to contact, and contingency arrangements

9. Managing medicines

Prescription and non-prescription medicines will only be administered at school:

- When it would be detrimental to the pupil's health or school attendance not to do so and
- Where we have parents' written consent

The only exception to this is where the medicine has been prescribed to the pupil without the knowledge of the parents.

Pupils are not permitted to carry paracetamol on them at the school. Should they require pain relief they must attend the office, or pupil services

Pupils under 16 will not be given medicine containing aspirin unless prescribed by a doctor.

Anyone giving a pupil any medication (for example, for pain relief) will first check maximum dosages and when the previous dosage was taken. Parents will always be informed.

The school will only accept prescribed medicines that are:

- In-date
- Labelled
- Provided in the original container, as dispensed by the pharmacist, and include instructions for administration, dosage, and storage

The school will accept insulin that is inside an insulin pen or pump rather than its original container, but it must be in date.

Emergency medication, including but not limited to asthma inhalers, adrenaline auto-injectors and diabetes-related equipment, should be carried by the pupil wherever appropriate to ensure immediate access when required. Arrangements for carrying, accessing and administering emergency medication will be clearly documented within the pupil's Individual Healthcare Plan (IHP), including any circumstances where medication is stored in an alternative agreed location.

All medicines will be stored safely. Pupils will be informed about where their medicines are at all times and be able to access them immediately. Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens will always be readily available to pupils and not locked away.

Medicines will be returned to parents to arrange for safe disposal when no longer required.

9.1 Controlled Drugs

[Controlled drugs](#) are prescription medicines that are controlled under the [Misuse of Drugs Regulations 2001](#) and subsequent amendments, such as morphine or methadone.

A pupil who has been prescribed a controlled drug may have it in their possession if they are competent to do so, but they must not pass it to another pupil to use. All other controlled drugs are kept in a secure cupboard in the school office and only named staff have access.

Controlled drugs will be easily accessible in an emergency and a record of any doses used and the amount held will be kept.

9.2 Pupils managing their own needs

Pupils who are competent will be encouraged to take responsibility for managing their own medicines and procedures. This will be discussed with parents, and it will be reflected in their IHP's.

Pupils will be allowed to carry their own medicines and relevant devices wherever possible. Staff will not force pupils to take a medicine or carry out a necessary procedure if they refuse but will follow the procedure agreed in the IHP and inform parents so that an alternative option can be considered, if necessary.

10. Managing illness during the school day

If a student becomes ill in a lesson and the teacher feels that medical treatment is required, the student should first be sent to the school office or pupil services, accompanied by another student.

Where parents have been contacted about their child being unwell, parents have the responsibility to collect their child or arrange for their child to be collected as soon as possible.

The Trust has a strict policy that no medication will be given orally or externally unless permission has been given by the parent in writing for a prolonged period or by email in a one-off situation. Parents will be contacted each time a new drug is to be administered to a child.

If the teacher feels that the student is too ill or injured to be moved, then a designated First Aider should be called. First Aid should be administered as appropriate. If it is thought that follow-up treatment is required, the parent will be contacted, or a letter sent home with the student.

In more serious cases, where hospital attention is deemed necessary, the Academy will contact parents, who will be expected to take their child to hospital.

The First Aider will inform parents in writing of any serious accident or attack or condition that occurs while the student is in one of the Academies; such occurrences will be recorded.

In an emergency, an ambulance must be called, either by the First Aider involved or the headteacher/deputy headteacher, and the parent contacted by the Academy. In the absence of a parent, a member of staff must accompany the student to the hospital and remain there until the parent arrives.

If a parent cannot be contacted, the school will act in loco parentis and give permission for any emergency treatment.

Staff will not take students to hospital in their own cars.

11. Off Premise visits

The Trust believes that all students are entitled to participate fully in activities associated with their Academy and will always attempt to accommodate students with medical needs. However, consideration must be given to the level of responsibility that staff can be expected to accept.

Parents must inform the school in writing of any known medical condition that their child suffers from. The staff supervising the trip/visit must be adequately briefed by the parents, including relevant emergency procedures and adhere to the child's IHP, if they have one.

If the visit extends beyond the hours of the normal school day and a student should need to take medication, the parent must inform the teacher in charge of the visit. The medication must be given to the teacher in charge with clear written instructions about the dosage.

It is the responsibility of the trip organiser and teacher to ensure that the medication is available when required. If this is likely to cause a problem, for example, because of the lack of refrigeration, this should be discussed with the parent.

Information Sharing for Off-Site Provision

Where pupils with medical conditions access alternative provision, off-site education, dual-registration arrangements or any other provision away from the school site, the school will ensure that appropriate information relating to the pupil's medical needs and Individual Healthcare Plan is shared with relevant providers, subject to data protection requirements. The school will work collaboratively with providers, parents/carers and healthcare professionals to ensure that appropriate support arrangements remain in place.

Pupils requiring injectable medication

Pupils requiring injectable medication will be supported in accordance with their Individual Healthcare Plan and educational visit risk assessment. Where appropriate, suitably trained and competent staff may administer prescribed medication to enable pupils to participate safely in off-site activities and visits

On returning to the school the medication and form is returned to the office.

Staff will not administer injections unless they have received appropriate training.

12. Unacceptable practice

School staff should use their discretion and judge each case individually with reference to the pupil's IHP, but it is generally not acceptable to:

- Prevent pupils from easily accessing their inhalers and medication, and administering their medication when and where necessary
- Assume that every pupil with the same condition requires the same treatment
- Ignore the views of the pupil or their parents
- Ignore medical evidence or opinion (although this may be challenged)
- Send children with medical conditions home frequently for reasons associated with their medical condition or prevent them from staying for normal school activities, including lunch, unless this is specified in their IHPs ● If the pupil becomes ill, send them to the school office or medical room unaccompanied or with someone unsuitable
- Penalise pupils for their attendance record if their absences are related to their medical condition, e.g., hospital appointments
- Prevent pupils from drinking, eating, or taking toilet or other breaks whenever they need to manage their medical condition effectively
- Require parents, or otherwise make them feel obliged, to attend school to administer medication or provide medical support to their pupil, including with toileting issues. No parent should have to give up working because the school is failing to support their child's medical needs
- Prevent pupils from participating, or create unnecessary barriers to pupils participating in any aspect of school life, including school trips, e.g. by requiring parents to accompany their child
- Administer, or ask pupils to administer, medicine in school toilets

13. Emergency procedures

Staff will follow the school's normal emergency procedures (for example, calling 999). All pupils' IHPs will clearly set out what constitutes an emergency and will explain what to do.

If a pupil needs to be taken to hospital, staff will stay with the pupil until the parent arrives or accompany the pupil to hospital by ambulance.

14. Training

Staff who are responsible for supporting pupils with medical needs will receive suitable and sufficient training to do so.

The training will be identified during the development or review of IHPs. Staff who provide support to pupils with medical conditions will be included in meetings where this is discussed.

All staff will receive periodic updates regarding the school's arrangements for supporting pupils with medical conditions as part of wider safeguarding, health and safety or induction processes.

The relevant healthcare professionals will lead on identifying the type and level of training required and will agree this with the headteacher, or another designated person. Training will be kept up to date.

Training will:

- Be sufficient to ensure that staff are competent and have confidence in their ability to support the pupils
- Fulfil the requirements in the IHPs
- Help staff to understand the specific medical conditions they are being asked to deal with, their implications and preventative measures.

Healthcare professionals will provide confirmation of the proficiency of staff in a medical procedure, or in providing medication.

All staff will receive training so that they are aware of this policy and understand their role in implementing it, for example, with preventative and emergency measures so they can recognise and act quickly when a problem occurs. This will be provided for new staff during their induction.

15. Record keeping

The local governing body will ensure that written records are kept of all medicine administered to pupils. Parents will be informed if their pupil has been unwell at school.

IHPs are kept in a readily accessible place which all staff are aware of.

16. Liability and indemnity

The local governing body will ensure that the appropriate level of insurance is in place and appropriately reflects the school's level of risk.

Details of the school's insurance arrangements are available from the school on request.

17. Complaints

Parents or carers with a complaint about the school's actions about their child's medical condition should discuss these directly with the headteacher, or another person designated by them in the first instance. If they cannot resolve the matter, they will direct parents/carers to the trust's complaints procedure.

18. Monitoring arrangements

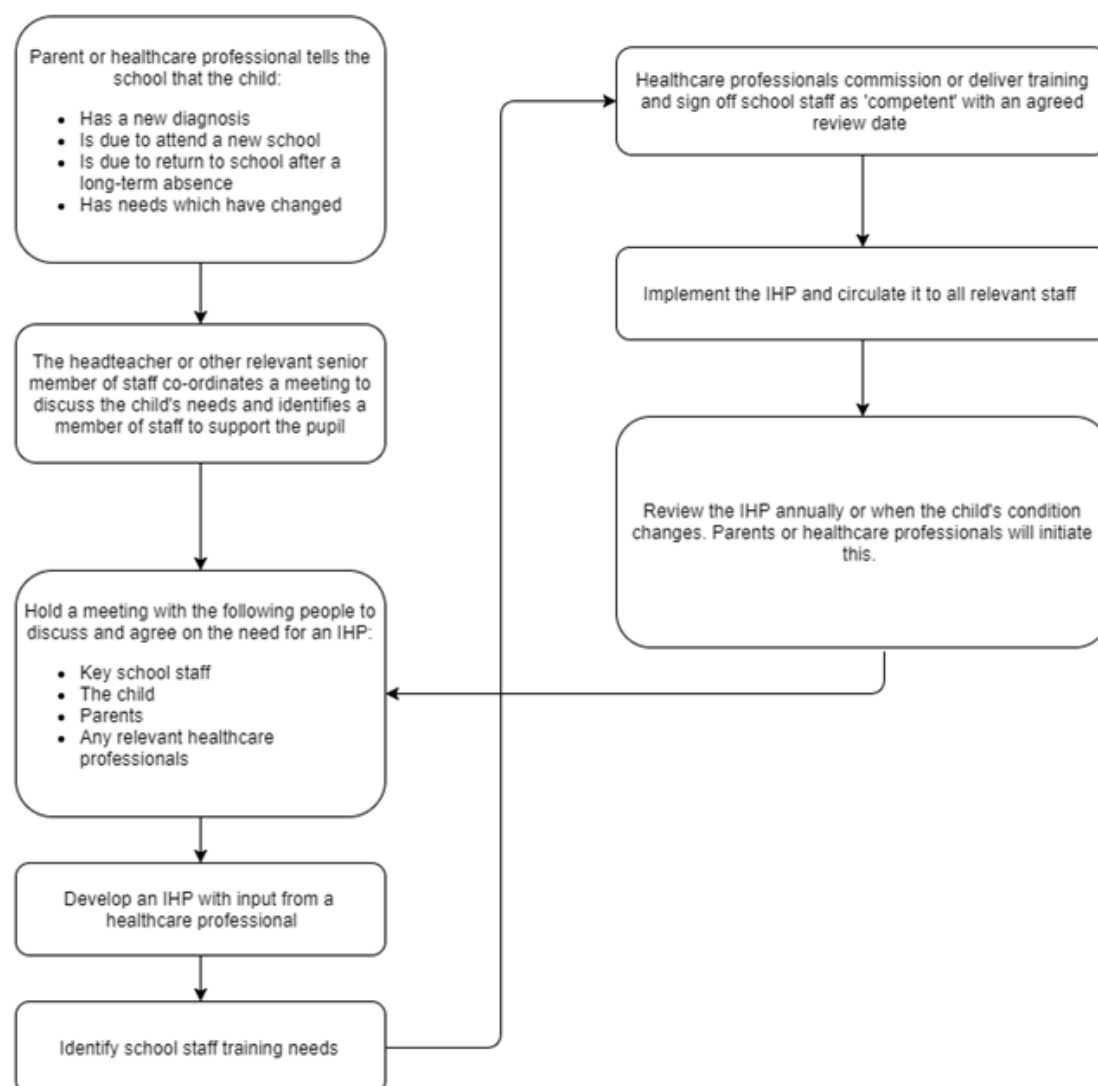

The headteacher will monitor implementation of this policy through periodic review of Individual Healthcare Plans, staff training records, medicine administration records and incidents relating to medical conditions. Findings will be reported to the Local Governing Body as appropriate.

This policy will be reviewed and approved by the Education Committee and adopted the local governing body (LGB).
